- Project Management
- Public Relations
- Teamwork
- Time Management
- Leadership
- Critical Thinking

HARD SKILLS

- HTML ,CSS AND JAVASCRIPT
- C Language

PROFILE

I am a second-year engineering student with a strong passion for web development and technology. I have experience in building responsive and user-friendly websites, with a focus on SEO optimization and mobile accessibility. My recent work includes developing websites for both professional clients, such as Eagle Eye Shield Security LLP, and personal projects like my tech blog "ishank.pages.dev." I am proficient in HTML, CSS, JavaScript basics, and currently expanding my skills in Java, Next.js, and Docker.

I have also participated in hackathons, where I led my team to a first-place finish. With a growing interest in backend development and ad integration, I am eager to apply my skills in real-world projects while continuing to learn. Beyond coding, I aspire to share knowledge as an educator in the future, though I am currently exploring tools like graphic tablets to enhance my teaching capabilities.

PROJECTS

EAGLE EYE SHIELD SECURITY LLP WEBSITE

- Developed a fully responsive and SEO-optimized website for a security company. The site includes detailed sections on services, client testimonials, and information about the director.
- Integrated hyperlinks, background effects, and images to improve user experience and mobile accessibility.
- Technologies used: HTML, CSS, JavaScript.

ISHANK.PAGES.DEV (PERSONAL PORTFOLIO WEBSITE)

- Developed a personal portfolio website to showcase freelance projects, blog posts, and educational content.
- The website is fully responsive, linking to GitHub and social media profiles, and designed with a clean, professional look.
- Technologies used: HTML, CSS, JavaScript.

Hackathon Winner (Team Lead)

- Led a team to first place in a hackathon, developing a creative and technical solution to a given challenge.
